Printed Fabric labels for Thermal Transfer Printing

La soluzione migliore per stampare le tue etichette di composizione

The best solution to print your care labels

Voilà la solution pour imprimer vos etiquettes de composition

Printex

Care Labels

Since 1995, when it was founded, PRINTEX SRL is leader in the manufacturing and distribution of all textile products suitable to make care labels, thermal transfer adhesive labels for barcode, retail tickets, labels for industry and shops.

All our products, for which we offer guarantee from 3 to 5 years, are MADE IN ITALY and created with high quality materials. We try to distinguish ourselves from the competitors by providing exceptional customer service taking care of all their needs .

The satisfactory results obtained so far with diligence, determination and honesty are an incentive to further improve our products and our services. Many thanks to all of those who have contributed to our growth and our success.

Printex developed a NEW complete system that allows you to print high quality fabrics material, Class 1 **OEKO TEX** certified, thanks to our new exclusive Thermal Transfer printer double side printing **X300** and our software **Copernico**, that with a simple Wizard enables you to print care labels in an easier way.

The innovation of this system is the possibility to print the back and the front side of the care label, renewing the printing way of garment industries.

LOSS PREVENTION

This document is strictly confidential.

This catalogue has been created and studied by Printex on the basis of years of experience in this sector.

The technical setting of the processes for the care label is very wide, therefore for any needs not listed or unclear in this catalogue, we kindly ask to contact us for a free consultation.

Questo documento è strettamente confidenziale.

Il catalogo è stato realizzato e studiato dalla Printex in base ad anni di esperienza nel settore.

L'impostazione tecnica dei processi per l'etichetta di composizione è molto vasta, quindi per qualsiasi vostra esigenza non riportata o non chiara in questo catalogo, vi preghiamo di contattarci per una consulenza gratuita.

PRINTEX TEST

The mentioned information in this manual are the results of scrupulous tests made by Printex. However we always suggest our customers to test the products by themselves according to the right process they are made for.

Over the time some products can be changed or switched with another.

Complete your set for care labels printing using our label editor software Copernico licensed by Printex.

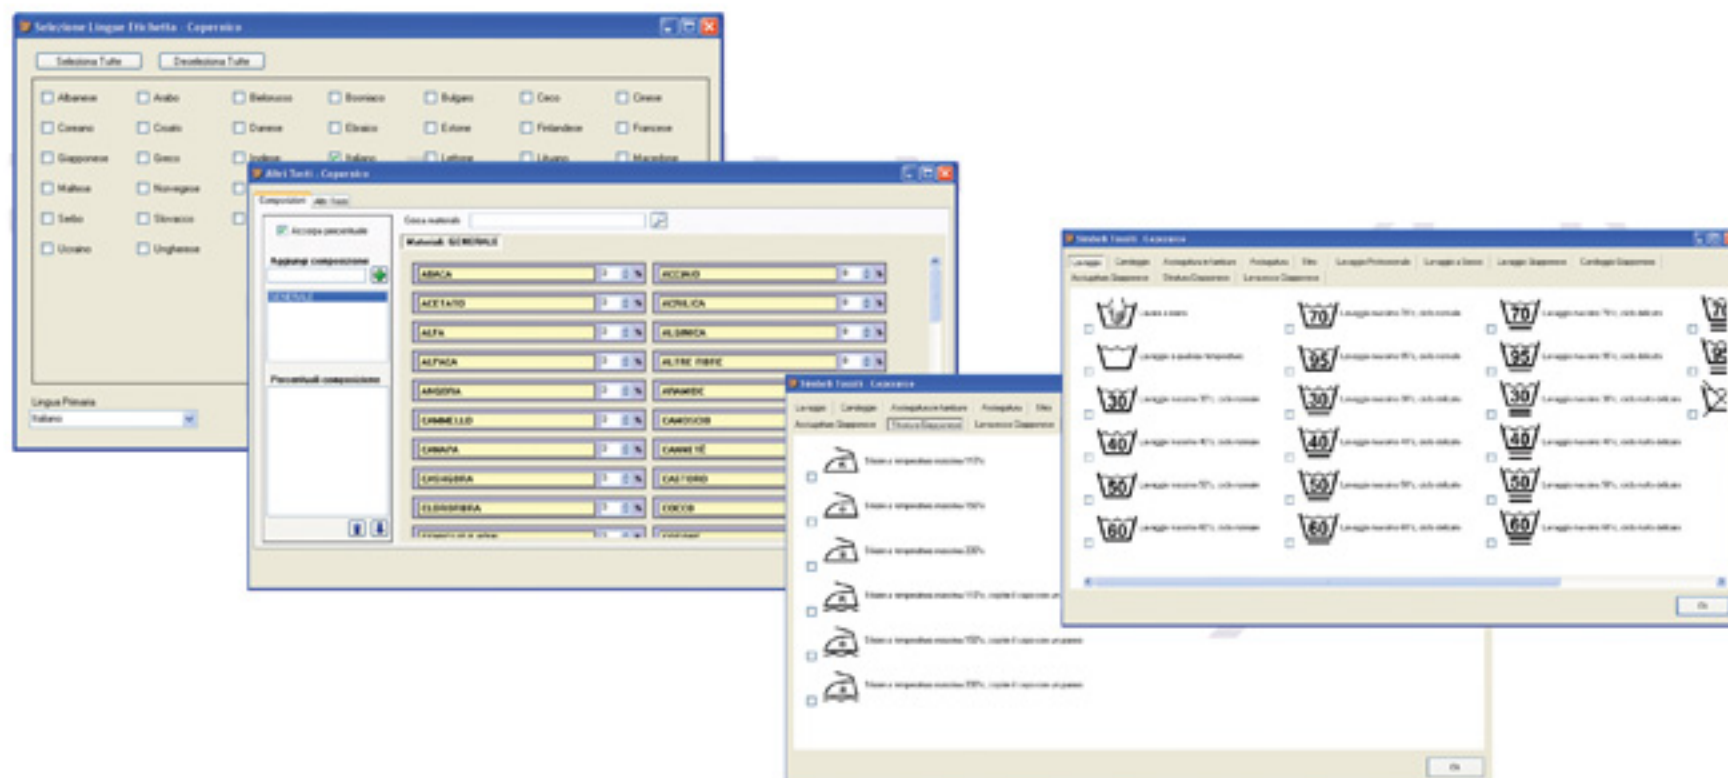

It is in compliance with current regulation regarding the symbol and details that have to be printed on the label.

A complete and easy **wizard** will help you to make a new care label according to your need.

A **rich toolbar** is at your disposal to insert lots of information on the labels.

Insert all the fabric component of the garment (like lining, fabric, and much more..). All international and japanese washing symbols are available in **37 different languages**.

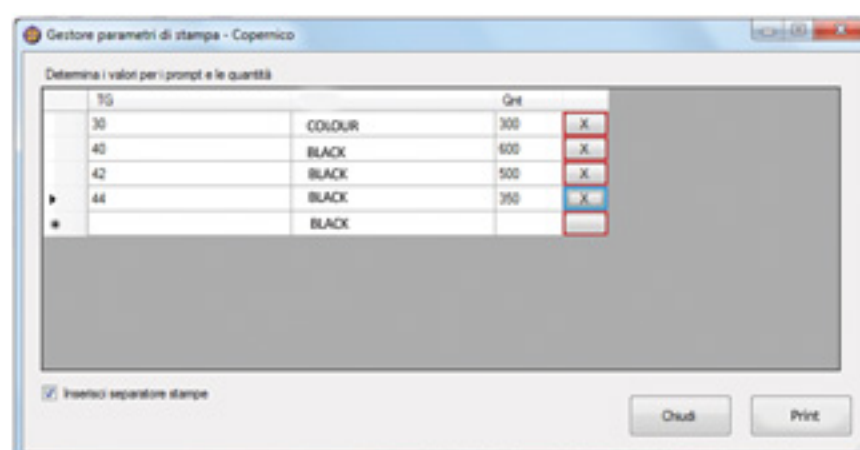

Copernico gives the possibility to import logos, images, and different kind of barcode.

Copernico also allows to import a database containing the info you need to put on the label.

It also manages the **double face printing** showing you the front and back side of the label.

If you have lots of different labels to print, thanks to Copernico you have the possibility to make a queue printing that will print automatically all different labels (check the picture below).

Copernico works with all printers equipped with Microsoft drivers. Suitable to print on care labels, retails tickets, self adhesive labels and others.
