Since 1995, when it was founded, PRINTEX SRL is leader in the manufacturing and distribution of all textile products suitable to make care labels, thermal transfer adhesive labels for barcode, retail tickets, labels for industry and shops. All our products, for which we offer guarantee from 3 to 5 years, are MADE IN ITALY and created with high quality materials. We try to distinguish ourselves from the competitors by providing exceptional customer service taking care of all their needs. The satisfactory results obtained so far with diligence, determination and honesty are an incentive to further improve our products and our services.

Many thanks to all of those who have contributed to our growth and our success. Printex developed a NEW complete system that allows you to print high quality fabrics material, Class 1 OEKO TEX certified, thanks to our new exclusive Thermal Transfer printer double side printing X300 and our software Copernico, that with a simple Wizard enables you to print care labels in an easier way. The innovation of this system is the possibility to print the back and the front side of the care label, renewing the printing way of garment industries.

## PRINTEX TEST

The mentioned information in this manual are the results of scrupulous tests made by Printex. However we always suggest our customers to test the products by themselves according to the right process they are made for.

Over the time some products can be changed or switched with another.
